100 Bags, each holding 3 bulbs, 15-16 ctm., (300 bulbs)	17.00

EVERY customer who enters your store is a prospect for a sale of Paper White narcissus bulbs. Here is a carefully designed, thoroughly tested method of displaying and selling them at a minimum of trouble and expense and the maximum of profit.

Florists cannot afford to sell inferior bulbs. Vaughan's bulbs of 13-14 ctm. circumference and up are of flowering size and highest quality. Three bulbs are enclosed in an illustrated bag which prevents picking over of the individual bulbs, injurious handling and resultant waste. Every bulb we ship you can be sold at a profit.

Our Paper White display box, specially reinforced, decorated in black, red and green, will harmonize with your store display and sell its contents. It occupies 10 by 20 inches space, and one filling provides \$24 to \$35 sales at 100% profit. Why let chain stores get sales which should be yours?

YAMTOX

A new insecticide that promises to replace Rotenone in the control of some insects. Yamtox is a concentration of the active principles of the Yam Bean (*Pachyrhizus erosus*). The Yam Bean affects many insects in much the same manner as Rotenone and seems to be the nearest approach to it. It has been used for centuries in the control of pests on vegetables in some parts of China. In Yamtox the toxic effects of the bean are extracted to make them as available as possible. They are further strengthened by chemicals of proven toxicity. Especially recommended for the control of Plant Lice, Red Spider, Thrip, Cyclamen Mite, Cabbage Worms, and most other insects that are controlled by Rotenone. It is very mild upon Plant Growth and safe to use even on most tender plants. Price per gallon, \$12.00; case of 6/1 gallon cans, \$11.00 per gallon; 30 gal. drum, \$270.00.

STIMROOT

An improved rooting compound which has been developed after extensive testing by a well known research organization. It contains several different hormone-like chemicals in sufficient quantities to produce root stimulation in the hard type of cuttings, and still is safe to use on the softer, more easily injured plants. Also contains a fungicide that helps retard the development of many kinds of fungi that contribute to the rot of cuttings while in the cutting bench. It is so formulated that a small amount of dust will effect a complete and even coating on each cutting. In this way a pound of dust will go further. Price, 1/4 oz. packet retails at 25c, per dozen \$1.80; 2 oz. retails at \$1.00, per dozen \$7.20; 1 lb. retails at \$5.00; each \$3.25; six for \$18.00.

D. N. DUST No. 12

To control Red Spider Mite and Thrips on Roses, Calla Lilies, Snapdragons, Gardenias and Carnations. Control should be obtained before blooming period if an application is necessary during bloom-time all marketable blossoms should be cut before dust is applied.

Packed in 10-lb. bags each, \$4.50; per case of 5 10-lb. bags, \$20.00.

D. N. SULPHUR DUST No. 10

FOR CARNATIONS

Effectively controls Red Spider Mite, Thrips and Rust. One pound of dust will cover from 400 to 800 square feet of bench space, depending on size of plants effective both in field and greenhouse non-injurious to plant foliage like D. N. No. 12 should be applied before blooming period, effective under varied conditions of temperature and humidity put up in 10-lb. pkgs. each, \$3.50; per case of 5 10-lb. pkgs., \$16.25.

TARTAR EMETIC

A spray for the control of Thrip, a life saver for gladiolus growers. Price, 1 lb., 90c; 5 lbs., \$4.25; 25 lbs., \$18.75; 100 lbs., \$70.00.

VIEW OF VAUGHAN TULIP FIELDS AT PARK ROSE, ORE., WHERE SUCCESSFUL EXPERIMENTS BEFORE THE WAR ESTABLISHED AMERICAN TULIP PRODUCTION ON A COMMERCIAL SCALE.

We are Oversold on Tulips, Daffodils and Lilies

As this catalogue goes to press we hold more orders for tulips, daffodils and lilies than we have the bulbs in sight to fill, except for the two varieties of tulips and the mixed daffodils listed below.

This is true in spite of the fact that we are delivering to our customers more bulbs than any other dealer in our field, and a majority of those delivered are of our own production, resulting from experimental plantings developed at heavy expense prior to the war.

The extensive pioneering work in hardy bulbs carried on for many years under the direction of the late Leonard H. Vaughan was responsible for a large proportion of the bulbs available to the florist trade as a whole in this emergency. Yet the demand far outstrips the supply.

Everyone knows the facts about lilies, of which America grows but a fraction of the number formerly imported from Japan. Because British tulips may now be planted at home, imports from that country this fall will be heavily reduced from last year's figure. We estimate the total supply of tulips at less than five percent of the number imported from Holland before the war.

Lack of lilies and tulips has expanded demand for daffodil bulbs three times. Labor shortage has prevented an increase in production, and drought in the Pacific Northwest reduced this year's harvest seriously.

Should the bulb supply be increased by timely victories in Europe, we will advise our customers without delay by trade paper ads and circulars.

THIS GROUP OF VAUGHAN'S GIANT AMARYLLIS WON FIRST PRIZE AT THE NATIONAL FLOWER AND GARDEN SHOW, CHICAGO, 1942

Giant Hybrid Amaryllis

One of the finest strains of Amaryllis we have ever seen. Flowers are immense, composed of broad, well-rounded, overlapping petals; of the most perfect form, ranging in color from pure white grounds with varied markings of rose, red and crimson to the richest self colors as scarlet, crimson, bright red, cherry and almost maroon.

Bulbs $2\frac{1}{2}$ inches and more and are sure bloomers. Make wonderful window displays.

SELECTED MIXED HYBRIDS		Doz.	100
$2\frac{1}{4}$ - $2\frac{1}{2}$ inch	\$2.30	\$16.00
$2\frac{1}{2}$ - $2\frac{3}{4}$ inch	3.50	25.00
$2\frac{3}{4}$ -3 inch	4.50	30.00
3- $3\frac{1}{4}$ inch and up	5.00	35.00
$3\frac{1}{4}$ - $3\frac{1}{2}$ inch	5.50	40.00

Anemones

One of the most showy flowers, good for cut flowers. They thrive in any soil except a very heavy clay. Set 10 inches apart, about $\frac{1}{2}$ inch deep. Sunny location, plenty of moisture. **Special Mixed**, number one bulbs, per 100, \$3.25; per 1,000, \$27.00.

Anemone St. Brigid Irish Champions. The largest flowered strain of Anemones ever offered in the United States. Large, brilliant flowers in a wide variety of colors, over 90% full double. Number one bulbs, per 100, \$3.50; per 1,000, \$30.00.

Brodiaeas

Capitata. The California Hyacinth, has slender stems, 6 to 12-inch, high capped with a close cluster of violet blue flowers. Flowers hold up well, so should be good for Florists use. 100, \$3.50; 1,000, \$30.00.

Calochortus or Mariposa Tulip

These famous California flowers resemble a tulip in shape, and are of many colors, shades and markings. Try a few in a cool house. **Mixed**, per 100, \$3.75; postpaid; per 1,000, \$32.50.

White Calla

(Aethiopica) Ready in September

Callas being natives of swampy regions grow to best advantage where there is an abundance of moisture, and are therefore very difficult to handle in the curing. Some growers practice **premature cutting off the tops**, expose bulbs to the sun, in order to make early shipment.

Our stock is **thoroughly cured in the ground and dried carefully** before they are packed. This means **later delivery** but better results can be obtained from such bulbs.

We caution forcers of Callas to water this stock sparingly after planting because Calla bulbs store up considerable moisture.

Peach Blossom, delicate pink.
Per 100, \$5.00; 1,000, \$45.00.

Dog Tooth Violets

(Erythroniums)

If they had no other beauty than that of their richly mottled leaves, they would be well worth a place in the shady corner. Their flowers are 3 inches across, with stems 6 to 18 inches high. The colors run in delicate tints of white, pink, cream, bright yellow and rose. They are hardy in the coldest States, and while they are at their best in a loose, gritty soil, rich in leaf mold, they also thrive in woodlands, in shaded corners, or in the crevices of rockwork in shade.

Americanum. It produces in April, small, lily-like flowers, which vary through white, pink, bright yellow, rose, and cream. Bulbs should be planted about 5 inches deep. Per 100, \$3.50; per 1,000, \$30.00.

Californicum has large cream-colored flowers. Per 100, \$4.00; per 1,000, \$35.00.

Tuo lumnensis is a superb species with flowers of the golden yellow, large leaves not mottled. Per 100, \$4.50; per 1,000, \$40.00.

Hartweggii is as pretty as Californicum, with more yellow in the flower, and each flower on a separate stalk. Very early and stands much heat. Good for pots. Per 100, \$4.00; per 1,000, \$35.00.

Hendersonii. Like Californicum, but the flowers are a lovely light purple, with centers a deep maroon. Per 100, \$4.50; per 1,000, \$40.00.

Mixed. Per 100, \$3.75; per 1,000, \$32.50.

Narcissus Paper White Grandiflora

From the Finest Crop Harvested in Florida
CROP IS VERY SHORT OF LARGE BULBS—ORDER EARLY!

All our bulbs are grown from stock that originally came from the same Frenchman who supplied us before importation of foreign bulbs was prohibited. We caution florists against buying cheap bulbs of Paper Whites. You might get bulbs which have been left in the ground two or more years, and which show double crowns. Such bulbs will produce plenty of foliage, but will lack flowers.

The fields from which our bulbs come were inspected by our bulb man at flowering time, to insure true type; and a further inspection was made at harvesting time. The stocks have all been tested for forcing in soil and in water and the reports from such tests are that while flowering somewhat later than imported bulbs, results are as good.

Ranunculus

With available flowers for early spring sharply reduced by the effects of war, the problem of every greenhouse owner is: What shall I plant in the benches usually devoted to material shut off by war?

Ranunculus offer an immediate answer to this problem. No other flowers available to the florist can produce such a riot of color. They make an immediate hit with the public, as every flower show proves. Market records show that supplies in the past have sold out quickly at good prices, and next spring they will have far less competition.

The important thing is to grow a good strain, and Vaughan's exclusive Victoria Hybrids have no rivals in abundant bloom, percentage of doubles, strong stems, and size of flowers. The color range embraces pink, yellow, orange, brilliant scarlet, vivid apricot and innumerable tints of these colors.

Culture is simple, and full directions will be supplied on request.

ANNUAL FLOWER SEEDS FOR FALL SOWING

Antirrhinum	Dianthus (Annual pinks)
Calendula	Gilia Capitata
Calliopsis	Gypsophila
Candytuft	Hunnemannia
Centaurea Cyanus	Larkspur
Cosmos	Mignonette

Cynoglossum (Chinese Forget-me-not) Poppy Shirley

The earliness of bloom, and the economy of growing compared to plants started in the Greenhouse, makes the sowing of certain annuals in the Fall a good gamble for Florists who can use summer cut flowers. Larkspur is a particularly good item for this culture. This method avoids transplanting, which is often difficult with Larkspur. Early plants grow better due to cooler weather, and the early flowers do not shatter as easily as those blooming during the hot spells.

When you sow seeds of annuals in Fall, you imitate Nature's method. Practically all hardy annuals will produce stronger, sturdier plants with earlier bloom by this method. Do not be in too much of a hurry to sow. The ideal time is just before the ground freezes for winter. November 15th is early enough in normal seasons in the vicinity of Chicago and New York. If the ground has been prepared in advance, sowings can also be made during winter thaws. A cold frame makes a good place to grow.

A fine seed bed is desirable. No covering of any kind is needed unless there is danger of washing or from birds, in which case a light, loose covering can be used. Plant at half the depth used when sowing seed in Spring. Broadcast all small seed. South of the Mason-Dixon line, sowing should be delayed until the late February and early March thaws.

CUCUMBER "THE VAUGHAN"

Vegetables for Greenhouse Forcing

Many florists plan to devote some greenhouse space to vegetable growing this winter. Reasons for this are numerous, among them the fact that vegetable growing takes less labor, and is done in cooler houses, economizing on fuel.

Demand for greenhouse vegetables is expected to be increased by shipping difficulties and reduced production in the south and west, which will lessen supplies from those centers.

We have long specialized in selected strains of vegetables for greenhouse culture. Such strains are necessary, because conditions are radically different and varieties bred for outdoor gardens cannot be depended upon to succeed in the greenhouse. We list the items most widely grown, and invite inquiry for others which you may wish to produce.

Forcing Cucumbers

The Vaughan. Our best greenhouse forcing cucumber. Very large, excellent slicer, a first quality table variety. Compared to other long white spine types, it is much darker, more uniform in shape and size, thinner and more prolific. It is the ideal American forcing variety, as well as the longest outdoor sort. Pkt., 20c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.

GRAND RAPIDS LETTUCE

Lettuce

Grand Rapids Forcing: Vaughan's Selected Stock for greenhouse use. This is by far the best sort for greenhouse forcing. Growers of leaf lettuce plant this delicious type almost to the exclusion of other varieties. The leaves are light green, tender, daintily curled and crisp. Our stock has been carefully bred for uniformity in type and season.

Vaughan's Extra Selected Stock: Pkt., 10c; oz., 30c; 2 oz., 50c; $\frac{1}{4}$ lb., 85c; 1 lb., \$2.50.

Grand Rapids Forcing Ohio Strain: Very dark green leaves. Differs from regular strain only in color of leaves. Preferred in some markets. Pkt., 10c; oz., 30c; 2 oz., 50c; $\frac{1}{4}$ lb., 85c; 1 lb., \$2.50.

Bibb Head: A favorite forcing lettuce in the south and shipped to the northern hotels where it has a reputation for its excellent quality. Smooth leaf, dark green, bleaching to a rich yellow, a small head but of exceptionally high flavor. Pkt., 25c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.

Grow Food for the Wartime Market

Radish

Improved Early Scarlet Globe: Vaughan's Selected Stock. This is the standard red radish for hot bed and forcing use. Very early, crisp, mild and tender; rich, bright scarlet in color, of uniform globe shape. Our strain for forcing is bred with short tops for ease in bunching and is unequalled in the markets. Oz., 15c; ¼ lb., 35c; 1 lb., 90c; 10 lbs. or more, 80c per lb.

Tomatoes for Forcing

In the greenhouse each tomato plant should produce at least 18 lbs. of fruit to pay for space occupied. It is, therefore, important that only the heavy yielding sorts should be used. We have selected the best strains possible for production, quality and resistance to verticillium wilt.

Early Chatham: Early red, small vine, very productive. Pkt., 25c; ½ oz., 85c; oz., \$1.50.

Michigan State: Bred to meet conditions in Michigan where there is an excess of cloudy weather. A smooth red tomato and very productive. Pkt., 25c; ½ oz., 85c; 1 oz., \$1.50.

Livingston's Globe: The Chicago market demands a pink tomato like this for the winter and spring months. It is very productive, grown in all sections and is especially recommended by the shippers in the Ohio territory. Pkt., 25c; ½ oz., 85c; 1 oz., \$1.50.

Grand Rapids: A good red sort. Pkt., 25c; ½ oz., 85c; 1 oz., \$1.50.

Globelle: (pink). Pkt., 25c; ½ oz., 85c; 1 oz., \$1.50.

Sureset: (pink). Pkt., 25c; ½ oz., 85c; 1 oz., \$1.50.

Waltham: Certified scarlet fruits, firm, good shippers and do not crack. Pkt., 25c; ½ oz., \$1.35; oz., \$2.50.

TOMATO MICHIGAN STATE

Chives

A perennial herb, a member of the onion family which every garden should grow. The slender, tubular leaves have a delicate onion flavor, just enough to season a green salad when the chopped-up leaves are used. The leaves are used for seasoning. The flowers are a beautiful lavender. Grow plants in paper pots for sale this winter, and to Victory gardeners for transplanting next spring.

Pkt., 15c; ½ oz., 40c; 1 oz., 75c.

Onion Sets

Egyptian or Red Perennial: For fall planting only. This variety never forms a large bulb; its value lies wholly in its special adaptability to produce green Onions for spring or fall use which are perfectly hardy and stay in the ground all the time. We sell in fall only, to be planted for early spring crop. Lb., 30c; 2 lbs., 50c; 5 lbs., \$1.25; 10 lbs., \$2.00.

Yellow Multipliers: Especially valuable for the first early spring bunch onion. They are very mild and sweet, far superior to the green onions from other sets. There are usually several stalks from a single bulb and in this way they are very productive. Their most important quality is their extreme earliness, being ready for eating ahead of any other kind. Plant in fall and carry through winter as green onions with a straw mulch. Apply mulch immediately the ground is frozen, and remove it in the spring as soon as thawing begins, since the plants will start growth then. Lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35; 10 lbs., \$2.50.

EGYPTIAN OR RED PERENNIAL SETS

MUSHROOMS GROWING FROM STERILIZED BOTTLE SPAWN

Mushroom Spawn

New Spore Culture: One brick will plant ten square feet. Price per brick (weight about 1 lb.) 35c; 5 bricks, \$1.50; 10 bricks, \$2.50; 100 bricks, \$18.00. No. 9 White Alaska Mammoth strain. A very popular sort with market growers.

Sterilized Bottle Spawn: Under ideal conditions of temperature and moisture, loose or bottle spawn will start running sooner and give quicker results than the brick spawn. This spawn is made in glass jars under absolutely sterile conditions, so that every mold weed seed or insect is destroyed and each bottle contains nothing but pure spawn. Full directions on how to grow Mushrooms will be sent with each order. Price per dozen bottles, \$7.50 not prepaid; per bottle, 75c; prepaid within third zone. One bottle covers 35 to 40 square feet. Some of our florist customers have been putting Mushroom Spawn on a late bench of Mums. This gives them plenty for their own use and most times a large quantity to sell. This idea is well worth a try.

Vaughan's Peonies

5 of a Kind at the 10 Rate—25 of a Kind at the 100 Rate

Prices are F. O. B. Western Springs, Ill., packing charges to be added at cost.

WE HAVE an exceptionally large stock of our own growing. Strictly true to name, all in strong divisions, with from 3 to 5 eyes each.

The figures preceding the varieties are the rating given to them by the American Peony Society.

Peonies in established plantings need to be fed each Spring. A top-dressing of a balanced plant food well worked in will do wonders, but it should be applied early.

Flowers to Hail Victory in 1945 Garden

While vegetable seeds maintained their high level of sales in 1944, flower seeds showed a sensational gain, and this trend is expected to continue in 1945. In spite of the scarcity of flower seeds, our packet seed assortments will contain more flower seed packets, in greater variety, to meet the increased demand.

Government pressure on everyone who can to grow vegetables will increase, as long as the war lasts, and continue for some time after peace. The customers who buy seeds from you now will continue for years to do so. Selling Vaughan's Victory Garden seeds gives your business an essential character. Plan for better display, and an increased sale next spring.

OUR RED, WHITE AND BLUE RACK

Red, White and Blue Display

We shall continue to use for 1945 the strikingly beautiful Victory Garden Display Rack designed in our national colors. The top panel will be red, the lower one white, and the sides and bottom will be blue. It makes a brilliant eye-catching combination and will give your store a patriotic atmosphere.

Design and construction of the rack will follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1945 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

GIANT MIXTURES

VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. The superb colors and color combinations—salmons, yellows, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.30; $\frac{1}{4}$ oz., \$2.25; oz., \$8.00; 4 oz., \$30.00.
